Although specifically designed for the anti-nuclear movement, it was deliberately not copyrighted and has become known worldwide for peace and non-violence. The peace symbol can now be found virtually in any context and consistently is used to convey messages of peace. The long standing meaning of the peace symbol universally recognized and known for peace and non-violence was found to retain its message regardless of context and, therefore, is incapable of distinguishing the source of a specific goods or services from other goods or services. So for now, and presumably well into the future, the universal peace symbol is free for all to use."
